

JSON

Load and dump JSON files

Load and dump JSON files

What you should understand is:

- The syntax of **dumping**:

```
with open('file_name.json', 'w') as file:  
    json.dump(data_to_save, file, indent=2)
```

- The syntax of **loading**:

```
with open('file_name.json', 'r') as file:  
    python_dict = json.load(file)
```
