BeautifulSoup

Installation + simple data pulling

Installation + simple data pulling

To install beautifulsoup:

        pip install beautifulsoup4

To install lxml / html5lib parser:

        pip install lxml / html5lib

What you should remember is:

- To get a soup: soup = BeautifulSoup('file/string', 'lxml')
- To print the soup: print(soup.prettify())
- To access to the first tag: soup.tag_name.tag_name…
